

Lake Chelan Yacht Club

2018 Goals

This is going to be a great year and I wanted to let you all know what my goals are.

#1 . I want to get our club house finished as permitted.

#2 . I want to get the breakwater repaired and or replaced as needed.

#3 . I would like to encourage the villa members to fund and install new water lines as needed and then reseal the roads.

#4 . I would like to set up for extending those water lines to 5 fingers for future development at the same time the villa upgrades their system.

#5 . I would like to limit the camper area down by the marina to only the yearly spots.

#6 . I would like to develop the lowest lot of the fingers first with power, water, and a septic system. If we move in this direction we can use this area as temporary RV spots for daily rentals which would open up that area down by the camper area for parking.

I think my biggest goal for the year is for our members to be treated fairly and equally as members. And to all get along and have fun.

I sincerely hope we as a club can see what we have here. Let's figure out a way to come together and pay for the upgrades needed i.e.; the breakwater, five fingers and general maintenance .

Sincerely your new Commodore Trey Gooch
